AND DEVICE FOR SUPPORTING PRODUCTION
OF GARMENT OR ORNAMENT**

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a method for producing and selling a garment, enabling to quickly produce and sell the garment satisfied by a customer, by selecting the favorite design and cloth of the customer, confirming a finished image from the selected design and cloth, correcting a paper pattern on the basis of the body shape of the customer, producing the garment and subsequently selling the produced garment.

SOLUTION: This method for producing a garment satisfied by a customer comprises selecting and determining the favorite design and cloth of the customer with a selecting device connected to a data base, setting a colored pattern on the selected design image by the use of cloth images, displaying a finished image by a computer graphic method, correcting a basic paper pattern for the determined design in response to the body shape of the customer, cutting a cloth for the garment on the basis of the corrected results, and subsequently sewing the cut cloths.
